

Index of all 59 recordings of the

Lila Talks between Charles Berner and Biljana Percinkova

The far left column has S next to the recording that were transcribed by Sindhu

The * is there to indicate which recordings have had their time stamps inserted during the 2nd edit.

The blue [Post](#) and [Pre](#) indicates four recording that have just been found and transcribed.

Column 2 is an out dates numbering system.

Day date and session are references to the original recordings.

First words are used to indentify each recording.

ID no was one system used to number the recordings.

The page numbers are referencing the page in the written transcript for the beginning of that recording.

These page numbers will change as graphs and such are added. They are referring to the single Word Document called Formal Talk Master 9.
